- ➤ Widescreen viewing monitor
- ➤ 6hrs battery life on eight AA batteries

Innovative widescreen
display for both eyes

Three simple
operating buttons

Description:

➤ The Nightfox 100V is our easiest to use night vision device. Three buttons (controlling the power, zoom, and IR illumination) and a focus wheel are right at your fingertips. Set up the 100V for extended periods, such as wildlife observation, using the tripod thread on the base.There are 7 levels of IR illumination to use in different conditions.

➤ The highest level is powerful enough that it provides clear vision up to and over 100m at night. The 3x magnification (6x with digital zoom) brings out the detail in the widescreen image.

➤ You'll need 8x AA batteries (not included). Use alkaline, lithium, or rechargeable NiMH with a capacity
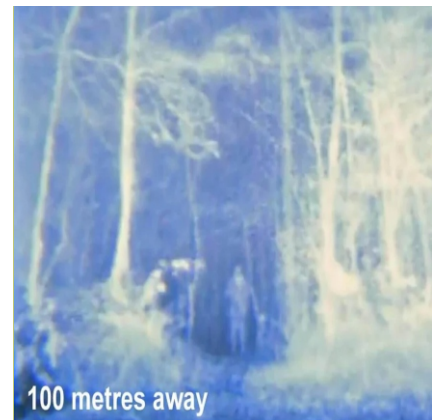

➤ of at least 2000mAh.

Specifications:

- Fixed Optical Magnification: 3x
- Adjustable digital magnification: 2x
- Digital sensor resolution: 640*480
- Unit dimensions (cm): 185*145*55mm
- Infrared LED power output: 1 watt
- Power supply: 8* AA, alkaline, NiMH or lithium
- Battery Life: 6 hours mixed IR use
- Recharge via USB: No
- Recording capability: No
- Recording resolution: N/A
- Unit dimensions: 185*145*55mm
- Unit weight: 603g without batteries
- Viewfinder technology: TFT
- Screen resolution: 320*240
- Objective aperature: 20mm
- Sensor type: CMOS
- Aspect ratio: 4:3
- Aperture: F1.4
- Viewing angle: 12°
- Viewing distance at night: 100m / 110 yards
- Wavelength: 850nm

What Includes:

- Nightfox 100V digital night vision binocular
- Neck strap
- Instructions (in English, German, French, Spanish and Italian)
