

NIGHTFOX RED HD NIGHT VISION GOGGLES

- Product out of stock in the UK until August/September. A small number may be available in July, contact help@nightfoxstore.com for updates and advice.
- 1x magnification, 940nm infrared LED
- Full High Definition (FHD) sensor: 1920*1080 resolution
- Records HD footage with audio to Micro SD (required)
- Includes LG-cell 3200mAh 18650 battery
- Extra wide FOV of 46°

Description:

- 1x MAGNIFICATION: When it comes to using night vision on the move, the best magnification is no magnification.
- MOUNT TO A HELMET: A GoPro-compatible mounting bracket on the top of the Red means you can use third party camera mounts to attach your Nightfox Red to a tactical helmet.
- CRYSTAL CLEAR FOOTAGE: The Red boasts a true Full High Definition (FHD) sensor: 1920*1080 resolution. Record anything you see as HD video footage onto a Micro SD memory card (not included).
- AUDIO RECORDING: The Red features a built in microphone. Capture your complete night vision experience like never before.
- ENERGY ALL NIGHT: The high capacity 18650 rechargeable battery gives over 3 hours of constant use and, unlike most rechargeable devices, can be easily removed and upgraded. What's more, you can recharge anywhere via USB. Take a portable USB power bank (not included), and roam all night!
- If you need any product support for your Nightfox, be confident you'll get it fast from the friendly, experienced Nightfox team based in the United Kingdom
