

GOGGLES:

NIGHTFOX SWIFT NIGHT VISION GOGGLES

- 1x optical magnification
- 70 metre (75yd) viewing range at night
- Head mount included in the package
- Integrated rechargeable battery, charge via USB
- Super lightweight, just 360 grams (12.7oz)

Description:

- The Nightfox Swift is our most versatile unit yet: Wear on your head using the included head strap, or mount to your own tactical helmet. The Swift can also be used as a handheld night vision binocular. With 1x magnification the Swift is designed for close-quarters use.
- There's an integrated 3000mAh lithium rechargeable battery. A charging cable is included, just plug into a phone charger or computer USB port. You can also plug the Swift into a USB portable battery and charge while on the go.
- The Swift has a GoPro-style mounting point on the top of the device. To mount the Swift to a tactical helmet, use camera accessories designed for GoPro.
